

## FREE STATE SATATE LEGISLATURE SITTING MEDIA RELEASE

**11 – 15 September 2017**

The Legislature work involves primarily three functions, namely (I) the consideration of the legislation, (ii) performing oversight functions, and (iii) being involved in public participation initiatives. Much of this work happens in the Committee system of the legislature. Committee work requires that Members be familiar with a wide variety of complex issues and hear from experts, including government officials, affected individuals, special interest groups, business people, academic, and professionals such as lawyers, accountant and economists.

The Legislature exercises its oversight and accountability responsibilities mainly through Committees of the Legislature who must report their findings and recommendation to a sitting of the full Legislature.
